### DETAILED ACTION

#### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 11-14, 16, and 20-24 are rejected under 35 USC 102(b). This rejection is set forth in the prior Office action mailed on February 2, 2003.

#### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-14, 16 and 20-24 are rejected under 35 USC 103(a). This rejection is set forth in the prior Office action paper number mailed on February 2, 2003.

#### *Response to Arguments*

3. Applicant's arguments filed on May 15, 2003 have been fully considered but they are not persuasive.

Regarding 102(b) rejection over Gavelin, applicants argue that the noil taught by the reference would not meet the criteria set out in the claims since it would not pass the P50 mesh. This is not convincing, because Gavelin teaches that the noil passes the P150 mesh which is smaller than the P50, see column 3, lines 28-42. The claims only require that the size distribution of the noils to be used pass the P50 mesh and Gavelin teaches that.

Art Unit: 1731

Applicants argue that the size of the noil is 0.1-1 mm; however this not the size of the original noil, but the flocculated one. There is nothing in the claims that precludes the use of flocculating agents, since the claims are open ended.

As to the arguments stating that the properties of the paper are different. There is nothing in the claims, which establish those properties.

Regarding 103(b) rejection, applicants argue that the pulp is adapted to make different papers than that disclosed by the reference, i.e., printing paper instead of Kraft papers. This is not convincing, because it has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. In re Hutchison, 69 USPQ 138. The pulp that has been used to make the paper of the reference can be used to make the same kind of paper as claimed.

### *Conclusion*

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
